Final-year Software Engineering student at the University of Buea, building full-stack web applications for problems I can see around me — a hospital records system, a municipal waste platform, a serverless expense tracker on AWS. I work mostly in TypeScript and JavaScript with Next.js, React and Node, and I am looking for an internship or graduate role where I can keep shipping real systems.

EXPERIENCE

Cloud Computing Intern, Zinger Systems — Jun 2026 – Sep 2026 · Buea

- Designed and deployed a production serverless application end to end on AWS — Cognito, Lambda, API Gateway and DynamoDB.
- Defined the entire stack as infrastructure-as-code with AWS SAM / CloudFormation.
- Set up CI/CD, monitoring and security controls including point-in-time recovery.
- Worked through the AWS Certified Solutions Architect Associate (SAA-C03) curriculum.

Full Stack Web Development Intern, Techarcgram — 2025 · Buea

- Wrote server-side JavaScript with Node.js and Express, including routing and middleware.
- Built a blog application with full create, edit and delete flows.
- Consumed and tested REST APIs with Axios and Postman, including authenticated requests.
- Built responsive layouts with CSS Grid, Flexbox and media queries; worked daily in Git and npm.

SELECTED PROJECTS

HospiCare EMR LIVE

Electronic medical records and pharmacy stock for a district hospital in Cameroon. One patient flows from reception to doctor to pharmacy, every action persisted and linked.

Next.js · TypeScript · Prisma · PostgreSQL · Auth.js · Tailwind — hospicare-emr.vercel.app

Serverless Expense Tracker LIVE

Full-stack expense tracking with authentication, CRUD and a spending dashboard, built serverless end to end and shipped through CI/CD.

React · AWS Lambda · Cognito · DynamoDB · AWS SAM · CloudFront

EcoPulse

Four-part smart waste platform for Buea municipality: a React dashboard with live route maps and analytics, a REST API with JWT auth, and two React Native apps — crews and residents.

React · React Native · Expo · Node.js · Express · MongoDB · Leaflet

CULTIA

B.Tech design project with a senior student: a platform for teaching and preserving Cameroonian heritage. Modelled the domain end to end — ER, class and use-case diagrams — and worked on the design.

System design · ER modelling · UML · Content workflow

Saveurs du Cameroun

Online ordering for a Cameroonian restaurant — categories, cart, registration and checkout with a printable receipt, plus an admin side for menu and orders. CEC319 coursework.

PHP · MySQL · JavaScript · HTML & CSS

EDUCATION

B.Tech, Software Engineering College of Technology, University of Buea — 2024 – present

GCE Advanced Level, sciences Sacred Heart College, Mankon — Bamenda **24 / 25 points** — 2022 – 2024

GCE Ordinary Level, sciences Sacred Heart College, Mankon — Bamenda **30 / 33 points** — 2017 – 2022

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, PHP, Dart, HTML, CSS
Frontend	React, Next.js, Tailwind CSS, Bootstrap
Backend & data	Node.js, Express, Prisma, PostgreSQL, MySQL, DynamoDB, MongoDB
Cloud & infra	AWS (EC2, Lambda, IAM, CloudFront, Cognito, DynamoDB), AWS SAM, Terraform, Vercel
Tooling	Git, Postman, npm, React Native / Expo

LEADERSHIP

Millennium Fellow UN Academic Impact & Millennium Campus Network
